The drawing consists of a grid of 10 rows and 10 columns of technical drawings. Each row represents a different valve size, with the grid number (A-J) and size (e.g., 50.44, 36.30) written in the top-left corner of each cell. Each drawing includes a cross-section on the left and a detailed side view on the right. The side views show the valve's internal structure, including the stem, seat, and various adjustment points. Dimensions are indicated with leader lines and numbers. The drawings are labeled with 'Fuller' and 'No. of' followed by a number. The grid lines are clearly visible, and the drawings are drawn in black ink.
